

Grain: World Markets and Trade

Russia Grain Export Quota to Curb Wheat Exports in 2025

Russia 2024/25 marketing year (Jul-Jun) wheat exports are lowered 1.0 million tons this month to 46.0 million. The world's top exporter of wheat recently announced that its grain export quota for the latter half of 2024/25 will be the smallest in 5 years. The export quota will be set at 10.6 million tons from February 15 to June 30, 2025, and will prompt a severe decline in Russia's wheat export pace, indicating that supplies are quickly depleting.

Russia's 2024/25 wheat crop is estimated at 81.5 million tons—a 10.0-million-ton decline from the prior year. Russia also entered the season with smaller beginning stocks than 2023/24, resulting in a 12-percent reduction in supplies year over year. Despite smaller supplies, Russia exported record volumes during the first half of the marketing year. According to Rusagrotrans, Russia wheat exports reached 29.4 million tons between July-December 2024, surpassing last season's record of 27.7 million tons. Despite import restrictions from major trading partners – Kazakhstan, Pakistan, and Turkey – Russian exporters took advantage of limited supplies from its competitor, the European Union, to expand shipments to other markets.

Russia's vigorous export pace has exhausted domestic supplies. According to SovEcon, Russia's December 1 on-farm wheat stocks were 25 percent lower than the prior year. In order to maintain domestic supplies and curb food price inflation, the Russian government applies a grain export quota for the final portion of the marketing year and a weekly floating export tax on wheat. These restrictive measures have been regularly implemented since 2020, but the export quota for 2025 is extraordinarily low compared to 2024/25 production.

The quota will prompt a slowdown in Russian exports beginning in February. Major importers Egypt, Turkey, Bangladesh, Algeria, and Saudi Arabia must look to other wheat suppliers such as Argentina, Australia, and the European Union to meet their consumption needs.

WHEAT

OVERVIEW FOR 2024/25

Global production is adjusted slightly higher this month to a record, with increases to Syria and Pakistan more than offsetting a reduction to Uruguay. Global consumption is forecast lower with cuts to Turkey, partially offset by higher feed and residual use for Ukraine. Global stocks are higher this month, but still the lowest since 2015/16, as an increase to Russia is tempered by a reduction for Turkey. Trade is down with lower imports for Turkey and China, while exports are cut for Russia and Ukraine. An increase to Argentina exports is partially offset by an increase to Brazil imports. The U.S. season-average farm price is lowered 5 cents to \$5.55 per bushel.

WHEAT PRICES

<u>Domestic</u>: U.S. quotes declined for most classes since the December *WASDE* based on a stronger U.S. dollar and slowing export sales. Soft Red Winter fell the most, down \$15/ton to \$234. Soft White Winter fell \$5/ton to \$233, while Hard Red Spring dropped \$1/ton to \$275. Hard Red Winter rose \$4/ton to \$252 with concerns over winter wheat crop conditions.

U.S. Daily FOB Export Bids

Note: Prices as of January 7, 2025

Source: International Grains Council

*Note on prices: HRW (Hard Red Winter); SRW (Soft Red Winter); SWW (Soft White Wheat); HRS (Hard Red Spring)

<u>Global</u>: Global exporter quotes were mixed since the December *WASDE*. Russian quotes jumped \$10/ton and EU quotes climbed \$3/ton with large tenders from Algeria and Saudi Arabia offering support. Weaker 2025/26 production prospects provided additional support to Russian quotes, along with tightening domestic wheat supplies. U.S. quotes rose \$4/ton with concerns over winter crop conditions. Argentine quotes settled \$3/ton higher as the 2024/25 harvest neared completion. Australian quotes, meanwhile, dropped \$6/ton with weak demand from major trading partner China and price pressure from the ongoing harvest. Canadian quotes declined \$4/ton on a slowing pace of exports.

Argentina	Australia	Canada	EU	Russia	United States
\$229	\$262	\$267	\$243	\$239	\$252

<u>RICE</u>

OVERVIEW FOR 2024/25

Global rice production is forecast down based on reduced estimates for China and Bangladesh. Global trade is forecast down based on reduced import demand for Indonesia and Bangladesh, balanced with lower exports from Vietnam and Thailand. Global consumption and stocks are forecast lower based on downward revisions for China.

RICE PRICES

Source: International Grains Council

Note on FOB quotes: Thai 100B, U.S. 4%, all others 5% broken white rice.

Since the December *WASDE*, global export quotes, aside from Pakistan, continued to decline. Pakistani quotes were unchanged at \$452/ton despite large sales to Indonesia. India quotes are down slightly, dropping \$4 to \$444/ton. Vietnamese quotes decreased \$59 to \$449/ton reflecting weaker demand from its core market, the Philippines. Thai quotes dropped \$20 to \$494/ton with lower demand from traditional markets awaiting the new crop. U.S. prices dropped \$5 to \$727/ton and Uruguayan quotes fell \$8 to \$700/ton on weaker sales to Latin America.

MARKET FEATURE

Modest Growth in Bangladesh Rice Imports Despite Trade Policy Changes

Bangladesh 2024/25 (May-April) rice imports are revised down to 600,000 tons this month, but still a rebound from the 25,000 tons estimated for 2023/24 imports. Late last year, some of the highlands and most of south-eastern Bangladesh experienced heavy monsoonal rainfall resulting in significant crop losses that could not all be replanted. Retail rice prices in local currency for rice have risen to their highest level in over a decade, prompting the Government of Bangladesh (GoB) to enact a series of policy measures aimed at facilitating rice imports. Despite a reduction in import tariffs and duties beginning October 31, 2024, the current pace of imports has remained stubbornly sluggish due to unfavorable foreign exchange rates and higher transportation costs.

To encourage imports, the GoB exempted the rice import duty (previously set at 62.5 percent) and most related taxes¹. Private sector importers have been allocated around 1.0 million tons of import permits for parboiled and white rice. Additionally, in recent weeks, the GoB issued multiple private sector import tenders and pursued government-to-government import agreements.

The key factor in low imports to date is the narrow price spread between the domestic market and world prices. In addition, both the depreciation of the taka against the U.S. dollar and the spread between the official exchange rate (119 Taka per USD) and a commercial letter of credit (125 – 126 Taka per USD) increase the potential import price. This, combined with the remaining tax and logistical costs, reduces the private sector's financial incentive to import rice. Following India's return to the export market in September, its rice is currently the most competitively priced. However, when accounting for transportation and logistics, the imported price is essentially on par with Bangladesh domestic prices. Burma, Thailand, Pakistan, and Vietnam have previously exported rice to Bangladesh, but export quotes for these origins are less competitive.

¹ Note: Currently, only a 2% Advance Income Tax (AIT) is applicable on rice imports. All other duties, VAT, and taxes are zero. For further information refer to the <u>Bangladesh Grain and Feed Report, BG2024-0014</u>

TRADE CHANGES IN 2025 (1,000 MT)

COARSE GRAINS

OVERVIEW FOR 2024/25

Global corn production is forecast down this month as a cut to the United States more than offsets higher production in China, Ghana, and Russia. Global trade is down from last month as lower exports for Brazil offset an increase to Argentina. Global imports are down from last month as cuts for China, Japan, and South Korea more than offset higher imports for Turkey. The U.S. season-average farm price is up 15 cents to \$4.25 per bushel.

CORN PRICES

Source: International Grains Council

Export bids (US\$ per metric ton)	6-Jan-25	4-Dec-24	5-Jan-24	% change, '24 - '25
Argentina, Up River	214	207	212	1%
Brazil, Paranaguá	225	217	229	-1 %
Ukraine	218	213	N/A	N/A
U.S. #3 Yellow Corn, Gulf	214	205	205	5%

Since the December *WASDE*, exports bids for all major origins increased. U.S. bids were up \$9/ton to \$214 reflecting robust demand for U.S. supplies in the first quarter of the marketing year. Argentine export bids were up \$7/ton to \$214 reflecting potential impacts of dry conditions on new crop supplies. Brazil bids rose \$8/ton to \$225 as season-end supplies face strong domestic demand for ethanol production. Ukraine bids rose \$5/ton to \$218, buoyed by bullish movements in other exporters.

MARKET FEATURE First Quarter U.S. Corn Exports Highest Since 2018/19

U.S. Corn Exports (Sep-Nov)

Totaling 13.0 million tons, first quarter U.S. corn exports in MY 2024/25 (Sep 2024 – Aug 2025) are the highest since the 16.1 million tons exported in 2018/19. In recent years, first quarter U.S. corn exports have faced strong competition from Brazil's *safrinha* exports. However, with uncharacteristically weak volumes from Brazil and another strong year of U.S. production, U.S. exports have seen a promising start.

2024/25 U.S. production is estimated to be the fourth highest on record at 377.6 million tons, down 7.0 million from last month on lower yields. However, with plentiful old-crop stocks, supply was relatively abundant in the first quarter. Export Sales Reporting data as of December 26 indicate that U.S. marketing year-to-date total commitments² are strong at nearly 39.0 million tons, particularly to Mexico. Mexico was the United States' largest destination for corn in 2023/24 as it faced a smaller crop due to drought. The forecast for Mexico's 2024/25 production is little improved as dryness persists, and Mexico is forecast to

U.S. Corn Total Commitments

import a similar volume of corn as its record-setting amount last year. Competitive U.S. prices have also spurred commitments from Colombia, currently at 3.6 million tons, the highest level in history for this point in the year.

² Total commitments are the sum of accumulated exports and outstanding sales (not yet exported).

In contrast, Brazil, the United States' primary competitor in the world corn market, exported uncharacteristically low volumes after its *safrinha* harvest. *Safrinha* exports begin in July and continue for around 6 months. Brazil's corn exports for the Sep-Nov 2024 period were the smallest in 3 years. One factor at play is growth in Brazil's corn ethanol production. Ethanol production data tracked by UNICA, the Brazilian sugarcane industry association, indicates that corn ethanol production is up by 30 percent from the prior season. Brazil has also contended with muted demand from China. In September-November 2023, Brazil exported 9.5 million tons to China, whereas this year that volume has cratered to under 400,000 tons. Notably, monthly China imports have been under half a million tons from August 2024 onwards, the lowest monthly volumes since March 2020, due to weak domestic corn prices and ample supplies.

The United States is forecast to export 62.2 million tons of corn in 2024/25, down about 700,000 tons from last month on lower supplies. If realized, this would still be the third-highest volume of exports on record. While development of the South American crop may impact sales later this marketing year, under current market conditions, the United States is off to a strong start for 2024/25 exports.

Country	Commodity	Attribute	Previous	Current	Change	Reason
Argentina	Corn	Exports	37,000	38,000	1,000	Higher old crop exports
Brazil	Corn	Exports	46,000	44,000	-2,000	Slow export pace, domestic use
China	Barley	Imports	10,000	9,500	-500	Slow import pace, weak Australia prospects
China	Corn	Imports	Imports 14,000 13,000 -1,000	-1,000	Larger crop, cut to global supplies	
Iran	Barley	Imports	1,000	1,500	500	Stronger imports from Kazakhstan
Japan	Corn	Imports	15,500	15,300	-200	
Korea, South	Corn	Imports	11,800	11,500	-300	Lower Brazil trade
Turkey	Corn	Imports	1,900	2,300	400	Pace of trade

<u>Southeast Asia:</u> Brunei, Burma, Cambodia, Indonesia, Laos, Malaysia, Philippines, Singapore, Thailand, Vietnam

Oceania: Australia, Fiji, New Zealand, Papua New Guinea

OTHER NOTES

<u>Marketing Years (MY)</u>: MY refers to the 12-month period at the onset of the main harvest, when the crop is marketed (i.e., consumed, traded, or stored). The year first listed begins a country's MY for that commodity (2022/23 starts in 2022); except for summer grains in certain Southern Hemisphere countries and for rice in selected countries, where the second year begins the MY (2022/23 starts in 2023). Key exporter MY's are:

Wheat	Corn	Barley	Sorghum
Argentina (Dec/Nov)	Argentina (Mar/Feb)	Australia (Nov/Oct)	Argentina (Mar/Feb)
Australia (Oct/Sep)	Brazil (Mar/Feb)	Canada (Aug/Jul)	Australia (Mar/Feb)
Canada (Aug/Jul)	Russia (Oct/Sep)	European Union	United States
China (Jul/Jun)	South Africa (May/Apr)	(Jul/Jun) Kazakhstan (Jul/Jun)	(Sep/Aug)
European Union (Jul/Jun)	Ukraine (Oct/Sep)	Russia (Jul/Jun)	
India (Apr/Mar)	United States (Sep/Aug)	Ukraine (Jul/Jun)	
Kazakhstan (Sep/Aug)		United States (Jun/May)	
Russia (Jul/Jun)			
Turkey (Jun/May)			
Ukraine (Jul/Jun)			
United States			
(Jun/May)			

For a complete list of local marketing years, please see the FAS website (<u>https://apps.fas.usda.gov/psdonline/</u>): go to Reports, Reference Data, and then Data Availability.

<u>Prices</u>: Many export bids and quotes in this publication are Free-On Board (FOB). FOB is a term of sale meaning that the shipper will pay all costs to deliver and load the cargo at a specified place, usually a ship, and then the receiver pays the costs from there on — normally the ocean freight and all subsequent costs of unloading and delivery. All references to ton, unless otherwise specified, refer to metric tons – 2204.62 U.S. pounds/1,000 kilograms.

<u>Stocks:</u> Unless otherwise stated, stock data are based on an aggregate of differing local marketing years and should not be construed as representing world stock levels at a fixed point in time.

<u>Consumption</u>: World totals for consumption reflect total utilization, including food, seed, industrial, feed, and waste; as well as differences in local marketing year imports and local marketing year exports. Consumption statistics for regions and individual countries, however, reflect food, seed, industrial, feed, and waste only.

<u>Trade:</u> All PSD tables are balanced on the different local marketing years. All trade tables contain Trade Year (TY) data which puts all countries on a uniform, 12-month period for analytical comparisons: wheat is July/June; coarse grains, corn, barley, sorghum, oats, and rye are Oct/Sept; and rice is calendar year (TY 2022/23 corresponds to Jan – Dec 2023).

EU Consolidation:

Effective January 1, 2021, the separation of the United Kingdom (UK) from the European Union (EU) was complete, including trade between both entities. Starting in May 2021 with the release of 2021/22 data, field crops PSDs reflect EU27 (shown in the PSD system as "European Union") and UK separately.

Beginning with the release of 2021/22 data, historical data for both EU27 and the UK are provided for 5 years (2016/17 through 2020/21). The trade figures starting from 1999/00 through 2015/16 represents the European Union (EU27 plus UK) and excludes all intra-trade. For the years 1960/61 through 1998/99, figures are the EU-15 and also exclude all intra-trade. EU-15 member states' data for grains are no longer maintained in the official USDA database. Data for the individual NMS-10, plus Bulgaria, Romania, and Croatia, exists only prior to 1999/00.

Statistics: (1) Wheat trade statistics include wheat (1001), flour (1101), bulgur (190430), and selected pasta products (190219, 190230, and 190240) on a grain-equivalent basis (all wheat flour and products are multiplied by 1.368). (2) Rice trade statistics include rough (100610), brown (100620), milled (100630), and broken (100640) on a milled-equivalent basis (rough rice is multiplied by 0.7 and brown rice is multiplied by 0.875). (3) Coarse grains statistics include corn, barley, sorghum, oats, rye, millet, and mixed grains but exclude trade in barley malt, millet, and mixed grains.

<u>Unaccounted:</u> This term includes grain in transit, reporting discrepancies in some countries, and trade to countries outside the USDA database.

The Global Commodity Analysis Division, Global Market Analysis, Foreign Agricultural Service, USDA, Washington, DC 20250, prepared this publication. Information is gathered from official statistics of foreign governments and other foreign source materials, reports of U.S. agricultural attachés and Foreign Service officers, office research, and related information. Further information may be obtained by writing the Division or calling (202) 720-3448.

<u>Note:</u> For further details on world grain production, please see <u>World Agricultural Production</u> 2024. This publication is available in its entirety on the Internet via the Foreign Agricultural Service Home Page. The address is: <u>http://www.fas.usda.gov</u>
