

# RICE MARKET REPORT

*"An In-Depth Analysis of Pakistan & Global Rice Markets and Trends"*

Monthly report **"January 2026 Edition"**

Dated: 25<sup>th</sup> January 2026

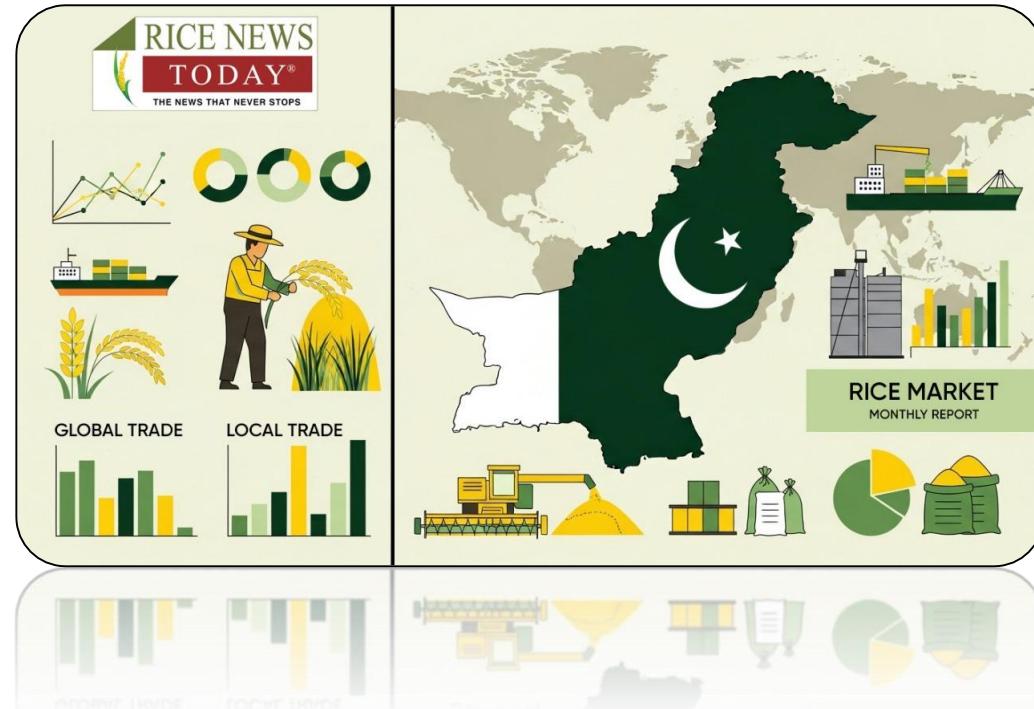

# CONTENT COVERED IN THIS REPORT

## What's Inside:

This report will cover the following topics:

1. Traditional & Emerging Basmati Markets
2. Top 10 Pakistan Basmati Brown Rice Import Markets
3. Top 10 Basmati Rice Markets for Pakistan & India
4. Comparative Analysis of EU Basmati Rice Imports from India and Pakistan
5. Pakistan Rice Exports To World & Major Destinations (**Basmati**)
6. Traditional & Emerging Non-Basmati Markets
7. Pakistan Rice Exports To World & Major Destinations (**Non-Basmati**)
8. Pakistan Month-wise Rice Exports Comparison (**2024 & 2025**)
9. Registered Varieties of Pakistan Being Traded
10. Comparison of Pakistan Rice FOB Prices
11. Pakistan rice sector – Key highlights
12. Comparison of Global Rice FOB Prices
13. Major update this month
14. Global Rice News Highlights
15. Upcoming Global Rice Events

# Mapping Traditional and Emerging Import Markets for Pakistani Basmati Rice

TRADITIONAL BASMATI IMPORT MARKETS			EMERGING BASMATI IMPORT MARKETS		
Region	Country	Key Highlights	Region	Country	Key Highlights
Europe & UK	UK, Italy, Belgium, Netherlands, Germany	~67% share in brown Basmati segment; zero-duty access under GSP+; strong price premium market.	Southeast Asia	Malaysia	Increased interest after India's export disruption; retail & industrial buyers active
GULF & Middle East	UAE	One of the largest buyers; consistent demand for both traditional and premium Basmati		Indonesia	Rising demand for parboiled & aromatic Basmati; steady growth
	Saudi Arabia	Traditional buyer; increasing demand for aged and aromatic varieties		Philippines	New entry point with public-sector G2G imports
	Iran	Resumed barter trade in <b>FY2024–25</b> ; vital buyer despite logistical challenges	South Asia	Bangladesh	First-ever <b>G2G rice</b> deal signed in 2025; includes premium varieties
	Oman, Qatar	Smaller but steady volumes; part of GCC distribution hub	East Asia	China	Importing broken rice & trying Basmati blends; demand rising for aromatic, cost-efficient varieties
Africa	Kenya	Key African market; mix of basmati and non-basmati shipments	Africa	Somalia, Benin, Ghana	Expanding trade networks; growing basmati interest among traders
North America	USA, Canada	Premium-focused market; growing demand for organic & low-residue rice	Central Asia	Uzbekistan, Kazakhstan	Untapped retail potential; test shipments reported by REAP
			Middle East	Iraq, Syria	Markets seeing gradual rice import growth

# Top 10 Import Markets of Pakistani Basmati Brown Rice

Rank	Country	Estimated Share	Key Notes
1	United Kingdom	~24%	Largest market; high demand for low-residue, organic-compliant rice
2	Italy	~21%	Major retail and ethnic food sector buyer
3	Netherlands	~13%	Hub for EU distribution; increasing organic imports
4	Belgium	~12%	Active in brown rice reprocessing and EU redistribution
5	Spain	~11%	Retail-focused imports for value chains and supermarkets
6	Portugal	~5%	Growing demand in Portuguese ethnic retail sector
7	United States	~4%	Niche demand for organic and ethnic store chains
8	Denmark	~2.5%	Imports for both ethnic and sustainable food segments
9	Poland	~2%	Mid-sized volume; retail and food processing sector
10	France	~2%	Small but steady importer of low-pesticide brown rice

Estimated based on REAP, Volza, and COMTRADE shipping data. Country-level FY2024–25 stats to be confirmed post PBS/TDAP release.

- These countries collectively account for **most** of Pakistan's **Basmati brown rice exports**.
- **EU** and **UK** remain critical due to zero-duty access and preference for brown rice in retail and processing chains.
- Early **FY2024–25** data (**Sept–Aug**) confirms **150,065 MT** of brown rice exports to **13 countries**, with these **10** leading the volume share.

# Top 10 Basmati Rice Markets for Pakistan & India

RANK	KEY MARKET	PAKISTAN'S PERSPECTIVE 	INDIA'S PERSPECTIVE 
1	<b>United Arab Emirates (UAE)</b>	A leading buyer of Pakistani basmati and also a major <b>re-export hub</b> , redistributing rice to other Gulf and African markets.	Strong destination for India as well, but more important as a re-export gateway than a final consumer.
2	<b>Saudi Arabia</b>	One of Pakistan's <b>biggest</b> Traditional market an important destination for Pakistan, though volumes fluctuate.	India's <b>single largest market</b> , buying the highest share of its basmati exports.
3	<b>United Kingdom</b>	One of Pakistan's <b>biggest premium markets</b> in Europe, where Pakistani basmati enjoys strong brand loyalty.	Also significant for India, with steady demand from South Asian diaspora.
4	<b>Italy &amp; Spain (EU)</b>	Among the <b>largest EU importers</b> of Pakistani basmati, both countries maintain long-standing trade links.	India also exports to these markets, but Pakistan has a stronger share.
5	<b>Netherlands, Belgium, France, Germany (EU cluster)</b>	Collectively a <b>core region for Pakistani exports</b> , with consistent demand across Western Europe.	India is present but holds a smaller share compared to Pakistan.
6	<b>Iran</b>	Imports from Pakistan are inconsistent due to trade restrictions.	One of India's biggest and most reliable buyers.
7	<b>Iraq</b>	Limited direct trade for Pakistan.	A <b>key growth market</b> for India in recent years.
8	<b>Yemen &amp; Oman</b>	Significant for Pakistan, especially Oman, where Pakistani rice has deep market penetration.	Moderate for India, with demand driven mostly by price competitiveness.
9	<b>Kuwait &amp; Qatar</b>	Both countries regularly import Pakistani basmati, ranking within the top 10 destinations.	Also purchase Indian basmati, though in slightly higher volumes.
10	<b>United States</b>	Smaller but growing market for Pakistan, supported by diaspora demand.	A <b>major premium market</b> for India, steadily expanding.

# Mapping Traditional and Emerging Import Markets for Pakistani Non-Basmati Rice

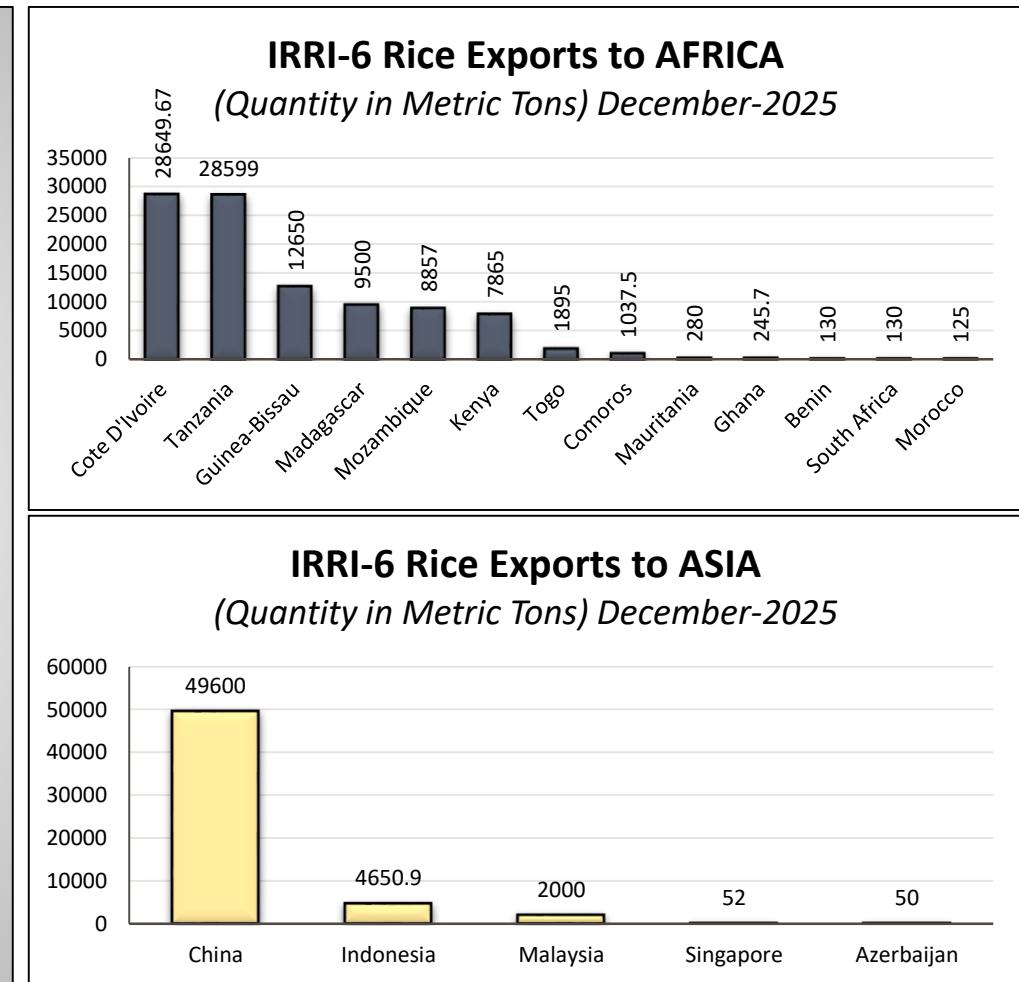

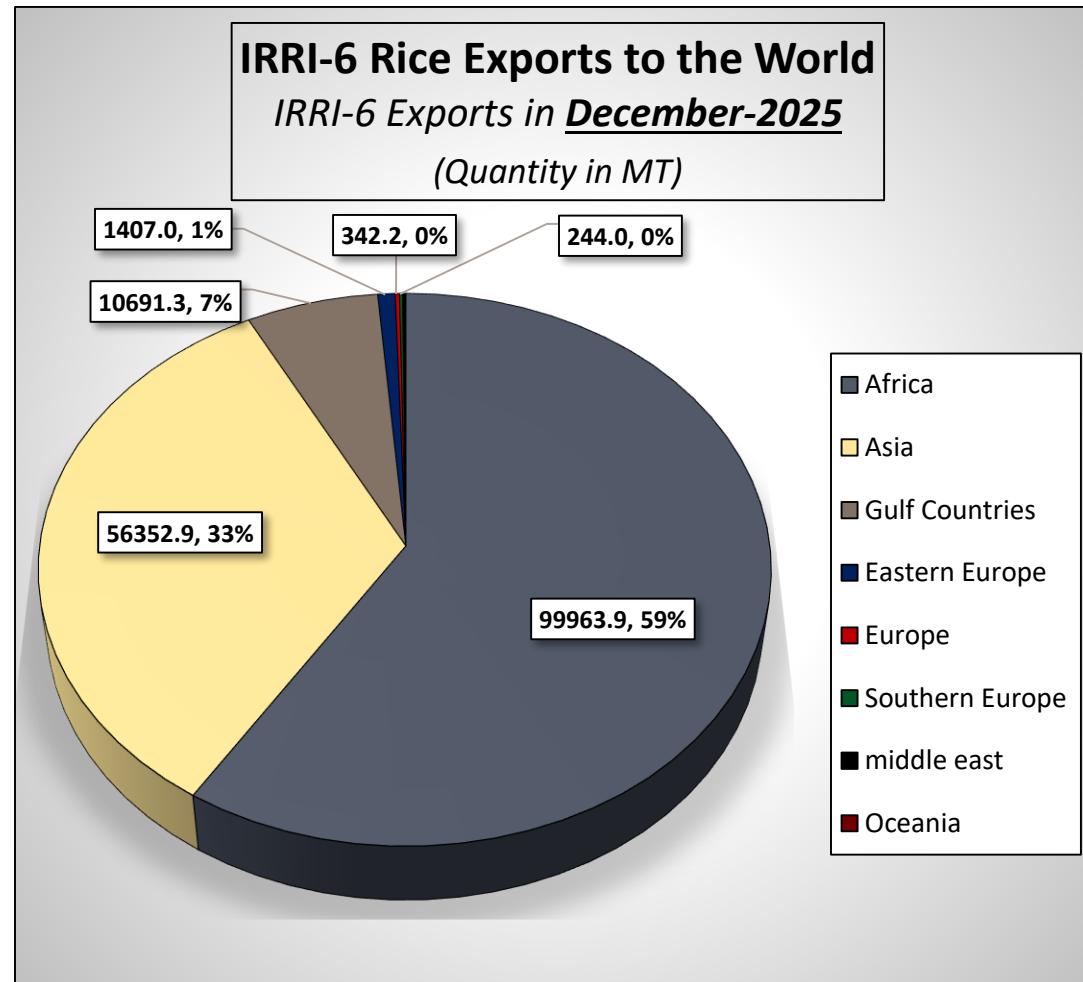

## TRADITIONAL NON- BASMATI IMPORT MARKETS

Region	Country	Key Highlights
Africa	Kenya	Largest buyer; ~252,000 MT in 2024. Customs value cut <b>\$615 → \$460/MT</b> ; duty-free quota of 500,000 MT till Dec 2025 ensures strong FY2025 demand.
	Mozambique, Madagascar, Tanzania, Djibouti, Cote d Ivoire	Long-time importers; steady demand for parboiled and broken rice, driven by government procurement.
GULF & Middle East	Iran	Imports IRRI and parboiled rice; trade continues through barter/private channels despite sanctions.
	UAE, Saudi Arabia	Steady buyers of IRRI and parboiled rice; UAE also re-exports Pakistani rice to GCC & North Africa.
South Asia	Afghanistan	Dependable market via border trade; imports mainly <b>IRRI-6</b> and Sella rice
Southeast Asia	Malaysia	Has imported both <b>IRRI</b> and parboiled rice from Pakistan for public tenders

## EMERGING NON-BASMATI IMPORT MARKETS

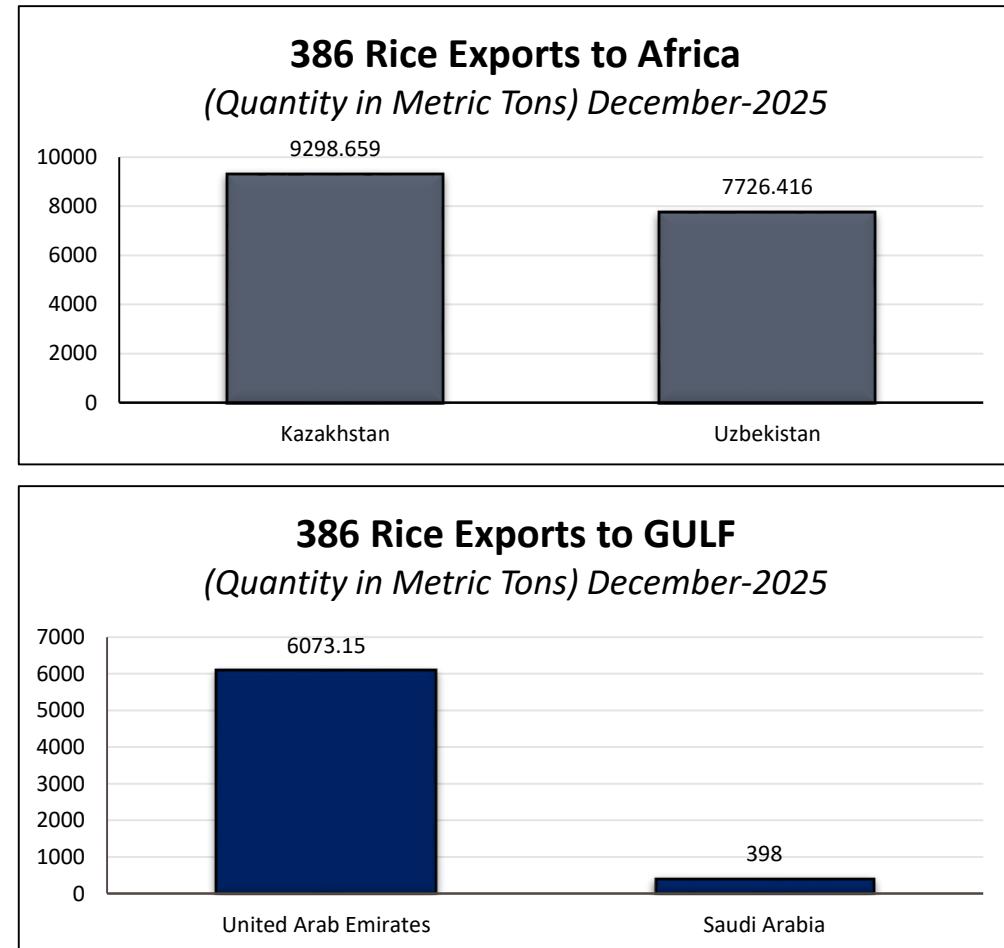

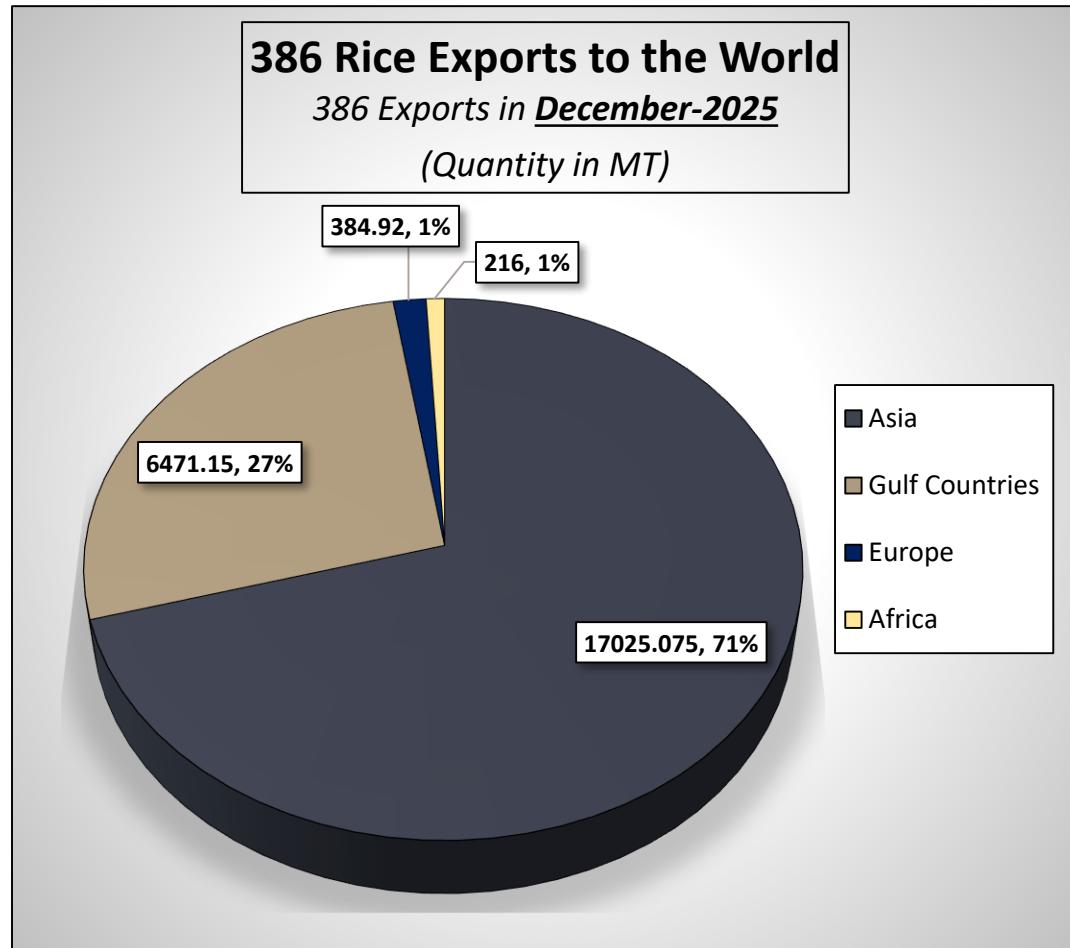

Region	Country	Key Highlights
South Asia	Bangladesh	First-ever <b>G2G rice deal</b> signed in <b>2025</b> ; imports include parboiled and white rice
Southeast Asia	Indonesia	Govt. tenders led to <b>~61,000 MT</b> import in <b>2024</b> ; continued interest in <b>2025</b>
	Philippines	Philippines' import liberalization has opened new demand for Pakistani broken/parboiled rice.
Africa	Benin, Ghana, Nigeria	Strong demand for <b>IRRI-6 and white rice</b> via bulk shipments
Asia	China	<b>5% broken rice</b> and <b>IRRI-6</b> for feed and processing; price-efficient preference
Central Asia	Uzbekistan, Tajikistan	Trial shipments underway; retail and wholesale demand rising
Latin America	Mexico, Cuba (exploratory)	Initial interest building through bilateral talks

# PAKISTAN RICE SECTOR – Key highlights of (January 2026)

---

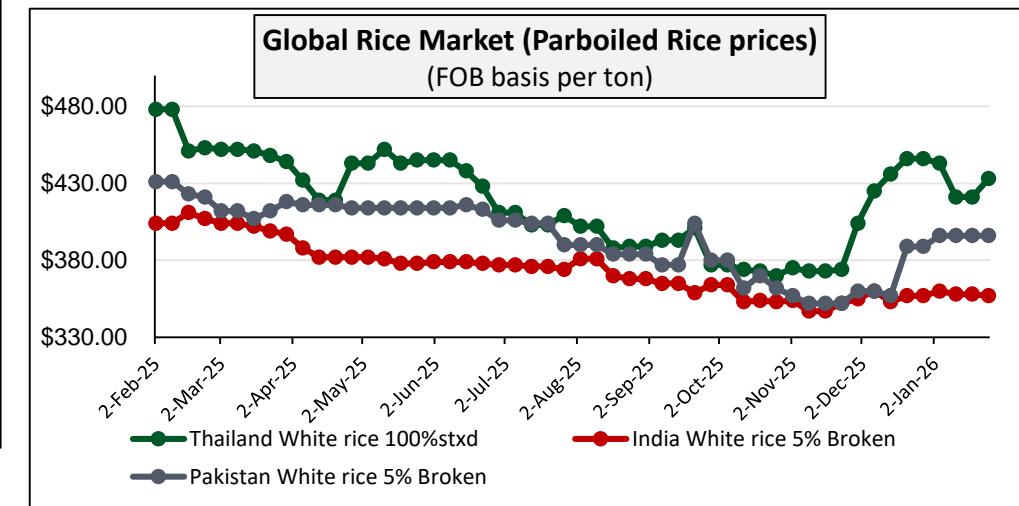

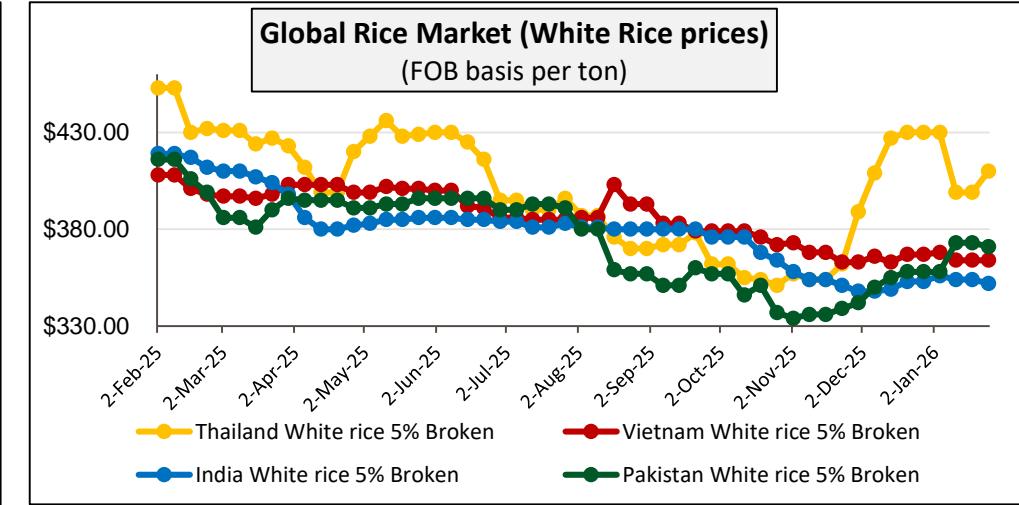

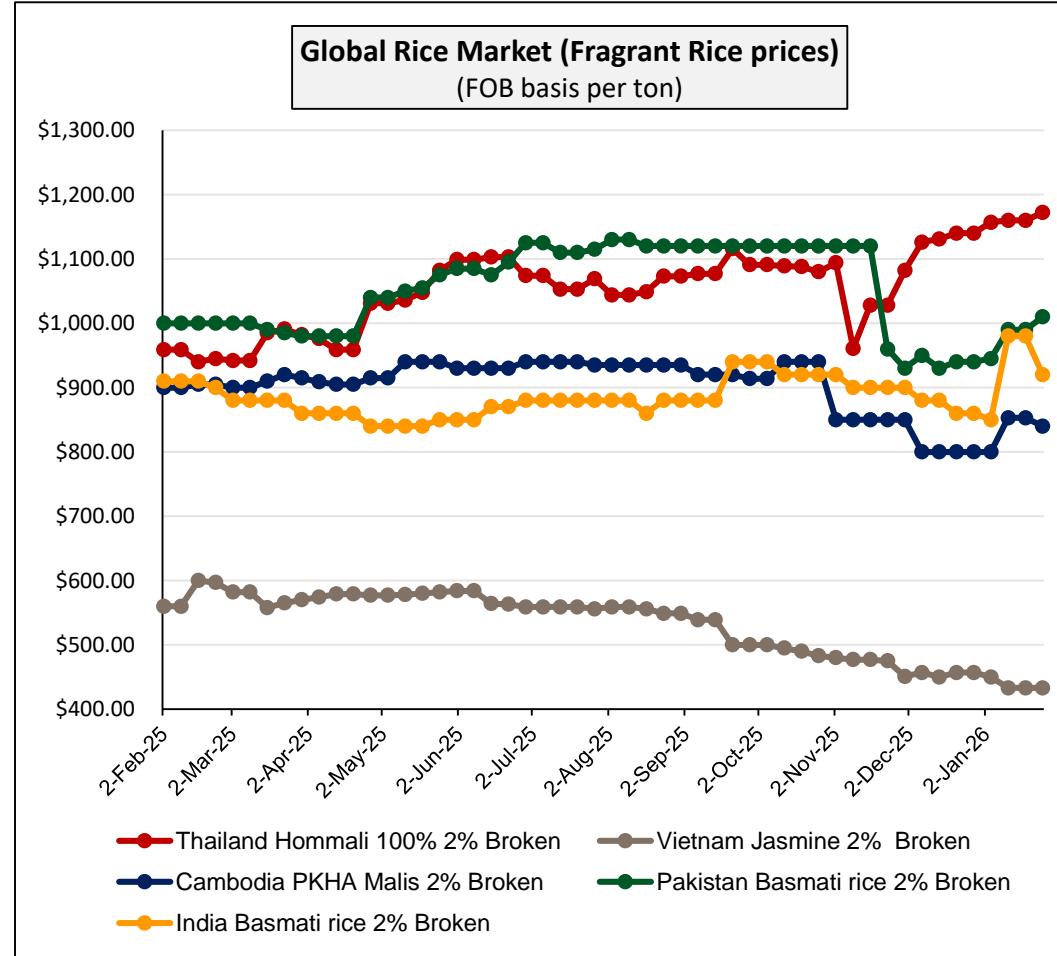

---

- **Pakistan** urged **Indonesia** to early-finalise a **government-to-government rice export MoU**, reviving the **2015** agreement that allowed **exports of up to 1 million tonnes annually**. **Commerce Minister Jam Kamal Khan** said rice exports remain a top priority as **Pakistan** seeks to re-engage key partners through price-competitive, reliable, and **quality-driven trade frameworks**, while discussions are ongoing to deepen long-term cooperation. (*21 January 2026*)
- **Pakistan's rice export growth** is supported by a **20%** expansion in cultivation area and expected output of around **11 million tonnes**, creating an exportable surplus of about **8 million tonnes**. However, increased reliance on **water-intensive non-Basmati rice**, enabled by nearly **650,000 solar-powered tubewells**, is accelerating groundwater depletion and raising long-term sustainability concerns for **premium Basmati cultivation**. (*20 January 2026*)
- **Pakistan's rice exports rose 14% month-on-month** in **December 2025** to a record **489,000 tonnes**, driven by a more than **50% surge in Basmati** shipments. The increase pushed **Pakistan** past **Vietnam** to become the **world's third-largest rice exporter**. The **UAE topped destinations**, followed by **China**, while **"Central Asia emerged as a new growth market led by Kazakhstan"**. (*19 January 2026*)
- **Prime Minister Shehbaz Sharif** ordered the formulation of a comprehensive export roadmap, identifying rice as a priority commodity to narrow Pakistan's trade deficit. He directed authorities to develop a coordinated rice export strategy in consultation with the **Rice Exporters Association of Pakistan (REAP)**, emphasized faster exporter reforms, and warned against delays in tax refunds. Officials confirmed that **government-to-government** negotiations on rice exports with several countries are underway, alongside efforts to improve port infrastructure and logistics. (*9 January 2026*)
- Pakistani scientists at **RRI Kala Shah Kaku** developed "**Sultan Basmati**," the **longest-grain Basmati variety** ever in Pakistan, with a raw grain length of **9.5 mm** and cooked length up to **20 mm**. The variety delivers yields of up to **70 maunds per acre** while retaining strong aroma and cooking quality, with exporters highlighting strong export potential subject to rapid farmer adoption and grain strength. (*6 January 2026*)
- Short-term inflation rose **2.41% year-on-year**, partly driven by higher rice prices, with **basmati broken prices up 0.96%** and **IRRI-6/9 up 0.75%** during the week. Rising rice prices contributed to **SPI inflation**, which has now increased for **22 consecutive weeks**. (*3 January 2026*)

# Hot Issue This Month (January 2026) – Iran Payment Risks Hit Indian Basmati Exports Amid Rising Trade Uncertainty

## Iran's Economic Turmoil Hits Indian Basmati Exports, Reshaping Regional Rice Trade Dynamics

*Surging inflation, currency collapse, and political unrest in Iran have severely disrupted India's basmati rice exports, creating supply gaps and payment risks that could offer Pakistan fresh opportunities in key premium markets.*

- Iran's worsening economic crisis has **pushed inflation above 42%**, with food inflation nearing **70%**, triggering **nationwide protests** and **sharply eroding purchasing power**. Retail rice prices in Iran have surged to the equivalent of **₹470 per kg**, reflecting severe stress in the food supply chain and undermining the country's ability to **sustain large-scale imports**.
- The crisis has severely disrupted **India's basmati rice exports** to **Iran**, traditionally one of its largest and most reliable markets. **Indian exporters** report payment delays, halted shipments, and consignments worth **₹1,500–2,000 crore** stranded at ports, as **Iran** withdrew subsidized foreign exchange for food imports following the collapse of the rial. **India exported 5.99 lakh tonnes of basmati rice worth over \$468 million to Iran during April–November FY26**, but trade has slowed to a near standstill amid currency instability, importer defaults, and communication breakdowns. Domestic prices of key basmati varieties in India have already declined sharply, reflecting excess inventories and buyer hesitation.
- Trade risks intensified further after **US President Donald Trump** warned of a **25% tariff** on countries trading with Iran, discouraging banks, insurers, and logistics providers from facilitating **Iran-linked transactions**. **Indian exporters** fear heightened sanctions exposure could further delay payments and restrict future contracts, even for food commodities.
- In response, the **Indian Rice Exporters Federation (IREF)** has advised exporters to halt unsecured shipments and urgently diversify into alternative markets across Africa, West Asia, and Europe. India is now actively seeking new destinations to absorb surplus basmati stocks as Iran slips from being its top buyer to third place.
- For **Pakistan**, the unfolding disruption presents a strategic opening. As **Indian basmati faces payment risks and market withdrawal**, Pakistan already strengthening its basmati credentials through recent legal and diplomatic wins could leverage stable supply chains, competitive pricing, and government-backed trade channels to regain or expand market share in **Iran-linked destinations, Central Asia, and premium Gulf and European markets**.

*The episode underscores how geopolitical instability and currency crises can rapidly reshape global rice trade flows, reinforcing the need for exporters to prioritize secured payments, diversified markets, and state-level engagement. For Pakistan, timely positioning could translate short-term turbulence into longer-term gains in the global basmati landscape.*

## MAJOR GLOBAL NEWS HIGHLIGHTS OF (January 2026):

- **India is seeking new markets for its basmati rice** as political unrest, economic instability, and US tariffs in Iran disrupt exports and delay payments. Exporters are now targeting **Africa, West Asia, and Europe** especially Nigeria to mitigate risks and maintain revenue from India's rice surplus.
- **India's Agri-export body APEDA** has resumed registration of non-basmati rice exports to the **Philippines** and **Senegal** after both countries lifted import curbs. The **Philippines** has opened imports for **500,000 tonnes** under tighter timelines and higher duties, while Senegal withdrew its month-long restriction, allowing exports to restart immediately.
- **India's rice exports surged w-o-w to 92,700 tonnes**, driven mainly by bagged rice shipments to Africa, with Kakinada and Kandla port handling most of the volumes. Liberia and Angola emerged as key destinations, reflecting steady demand from **African markets** despite cautious global trade conditions.

Source: News & Publications

- The **Philippines' rice production** rose **3% to 19.68 million metric tons (MMT)** in **2025**, up from **19.09 MMT** in **2024**, but remained below the 2023 record of **20.06 MMT**. Irrigated farms grew **4% to 15.15 MMT**, while rainfed farms slightly declined to **4.52 MMT**. Corn output also increased **2.22% to 8.32 MMT**.
- The **Philippines lifted its four-month rice import ban on Jan. 1**, resuming imports with a **15% tariff** while the planned **20% rate** is yet to be implemented. The government allows **500,000 MT** to enter through 17 ports by end-February, managing imports to protect local farmers' prices, while **Thai exporters** see this as a positive opportunity.
- **Philippines rice imports** fell nearly **30% in 2025 to 3.37 million MT**, the lowest in four years, following a four-month import ban amid improved domestic production. **Vietnam remained the top supplier**, but arrivals plunged after September, helping stabilise farmgate prices as the government shifts toward tighter import controls and **higher tariffs in 2026**.

Source: News & Publications

## MAJOR GLOBAL NEWS HIGHLIGHTS OF (January 2026):

- **Thailand beats 2025 export target despite competition** Thailand's rice exports reached **7.9 million tonnes** in **2025**, exceeding the **7.5 million-tonne** target, valued at **148 billion baht (US\$4.52bn)** on strong year-end demand. However, white rice exports fell **39.9%** to **3.62m tonnes** and fragrant rice declined **6.35%**, due to stiff price competition from **Vietnam, India and Pakistan**.
- **Thailand–China G2G deal delayed; pricing remains uncompetitive** The **100,000-tonne Thailand–China G2G** rice shipment has been delayed due to cabinet and legal approvals. **Thai 5% rice at US\$399/tonne** is US\$50–60 higher than regional peers, limiting competitiveness despite **China signaling total imports of 500,000 tonnes**.
- **Cautious 2026 outlook; stock rules unlikely to disrupt trade** Thailand set a **7 million-tonne export target for 2026** amid rising global supply and demand risks. Global rice stocks are forecast at **188.83 million tonnes**, dominated by **China and India**, while proposed stockpiling rules are seen as neutral for exporters.

Source: News & Publications

- **Vietnam projects 7.73 million tonnes rice exports in 2026** Vietnam's rice exports are expected at **7.73 million tonnes**, based on **43.55 million tonnes** of paddy from **7.09 million** hectares, mostly from the Mekong Delta. The export mix includes **5.8 million tonnes** of **high-quality/fragrant rice (75%)**, **773,000 tonnes glutinous rice (10%)**, and **1.16 million tonnes** for processing (15%), with shipments split between **4.01 million tonnes in H1 and 3.72 million tonnes in H2**.
- **Philippines to import 2.5 million tonnes from Vietnam** Vietnam plans to **export 2.5 million tonnes** to the **Philippines in 2026**, resuming purchases after a **4-month suspension in late 2025**. Imports are expected to be controlled via quotas and tariffs, maintaining Vietnam as the country's main rice supplier.
- **Exporters face price pressure from oversupply and competition** from Thailand, while traditional markets like Indonesia and Malaysia limit imports. The strategy is shifting to premium, high-quality, and branded rice for stable markets including **China, Africa, Hong Kong, and Europe**, targeting profitability over volume. **Total exports are expected around 7.5–8 million tonnes, similar to 2025**.
